

What is your obsolescence management strategy?

3 reasons to turn to Central Semiconductor before a costly redesign:

1 BROAD RANGE OF DEVICES

Central manufactures over 3,000 diminishing source discrete semiconductors, including metal cans and epoxy molded axial and radial devices.

2 GUARANTEED AUTHENTIC PRODUCTS

You are guaranteed to receive authentic Central Semiconductor products by purchasing directly from Central, through one of Central's franchised distributors, or by contacting an authorized manufacturer's representative for Central's products.

3 ON-TIME DELIVERY

Most products ship immediately from stock or have exceptionally short lead times. It's no wonder Central Semiconductor is the preferred discrete semiconductor manufacturer to OEMs globally.

Manufacturer of World Class Discrete Semiconductors

Diodes

Rectifiers

Bridge Rectifiers

TRIACs / SCRs

CLDs

Small Signal Transistors

Bipolar Power Transistors

MOSFETs

Multi Discrete Modules

Transient Voltage Suppressors
