

High Voltage 8 and 16 Amp Schottky Rectifier Series

CSHD8 Series (8 Amp)

60V, 100V and 200V in the DPAK package

CSHDD16 Series (16 Amp)

40V thru 200V Dual Common Cathode in the D²PAK package

Central Semiconductor's **CSHD8 series (8 Amp)** and **CSHDD16 series (16 Amp)** are Schottky rectifiers designed for a wide range of applications requiring high current capability, low forward voltage drop and high reverse voltage capability.

Features:

- High reverse voltage capability up to 200V (V_{RRM})
- Low forward voltage (V_F)
- Low reverse leakage current (I_R)
- High surge current capability (I_{FSM})

Applications:

- DC-DC output rectification
- Flyback diode
- Reverse polarity protection
- OR-ing diode

Benefits:

- Energy efficiency
- Standard DPAK and D²PAK surface mount packages
- Extended temperature range (+175°C)
